# Freelance Resume Consultant

## Project Overview

The Freelance Resume Consultant is a ChatGPT Project designed to review existing resumes and suggest actionable improvements to their structure, formatting, wording, and ATS readability.

## Objectives

- Review resumes pasted as text or uploaded as PDF, DOCX, or TXT files.
- Identify resume strengths and areas for improvement.
- Rewrite experience bullet points using the STAR method.
- Recommend strong action verbs and measurable achievements without inventing results.
- Identify potential Applicant Tracking System (ATS) readability issues.
- Tailor recommendations to the user's target role or industry.

## Key Features

- Executive summary of the resume
- Strengths and weaknesses analysis
- Before-and-after bullet point rewrites
- STAR-method recommendations
- ATS optimization tips
- Professional, constructive feedback

## Scope and Limitations

The consultant improves existing resume content. It does not fabricate qualifications, job titles, projects, certifications, or achievements. It does not create a complete resume from scratch or provide legal advice or career coaching.

## Required Review Format

1. Executive Summary
2. Strengths
3. Core Areas of Improvement
4. STAR Bullet Point Conversions (Before vs. After)

5. ATS Optimization Tips

### Quality Requirements

- Rewritten experience bullets begin with strong active verbs.
- Suggestions remain truthful to the candidate's supplied information.
- Feedback is professional, encouraging, and actionable.
- Uploaded resume content is reviewed carefully, including formatting and column-related issues where readable.

### Project Configuration

This assistant is intended to run within the ChatGPT Projects workspace.

## Testing

The project will be evaluated using test cases for resume review, STAR-method rewrites, ATS readability, role-specific recommendations, and prevention of fabricated information.
